SELECTED WEB APPLICATIONS

<https://tranquil-thicket-54252.herokuapp.com/> A MERN stack app for a small business where user can login and signup, leave a reviews, view the gallery, and booked an appointment. It used, REACT.JS, NODE.JS, EXPRESS.JS, BCRYPT, Heroku, APOLLO-SERVER-EXPRESS, MONGOOSE, JWT, FAKER, and Apollo/client

<https://relaxed-seahorse.netlify.app/> An initial React app for a client who was just starting her blog journey. This app features a different exercises where users can follow or get inspirations from.

<https://fixup-job.herokuapp.com/> - FixUp is a full-stack web application where a user can create an account, post jobs, apply to jobs, and rate jobs. It used Node, Express, MySQL, and Handlebars templates. I developed strong collaboration, teamwork, and communication in the process. Took responsibility for initiating the user interface.

<https://tutor-central.herokuapp.com/> - A Tutor Central is a freelance marketplace for top experienced developers to provide tutoring services. Learn from tutors and get your problems solved by freelancers. We used MongoDB, Express, Node, and React on this project.

<https://alma-dev914.github.io/movies-watchlist/> - An app that was built with React and used third-party API like TMDB. This is a personal project using my knowledge of how to fetch data from an API and also explore the SASS framework.
